

Introducing- *WiFi Xstream*- your answer to the challenges of connections in homes, retail stores, office buildings, restaurants, and more! WiFi Xstream with GigaCenter is an integrated commercial grade router. This powerful router is placed centrally in your home or business to stream video, music, gaming, and internet over WiFi up to 5X faster than today's standard routers.

How will Managed WiFi with GigaCenter help you?

•Predictable Wireless Performance:

By allowing us to manage your network, we can troubleshoot more efficiently, quickly manage system traffic, and map out networks.

•Escalated Service and Support:

Get help when you need it with our 24/7 technical support.

•Extended Range and Coverage:

This flexible infrastructure can grow as the needs of your family or business grows. Need additional coverage? No problem. We can easily add additional Wi-Fi Access Points for a low monthly fee.

•Worry Free Installation:

Our technicians will install and optimize your wireless network, ensuring that your router and access points are placed in an area which will give you the most effective connection to your wireless devices. Free consultation upon installation.

•Cloud Based Management:

Your wireless network is at our fingertips with our cloud based management portal. This gives our technicians real-time data on your router, access points, and connected devices.

•More Channels:

Serves all devices at once with less waiting.

•Free NetValet App:

Allows you to control users and devices, set access policies, monitor traffic, and have parental control features.
