Linear Z-Wave Lighting Products

LB60Z-1 Dimmable LED Light Bulb

The LinearLinc™ LB60Z-1 is a Z-Wave controllable and fully-dimmable, instant-on LED screw-in light bulb that provides pleasant soft-white illumination equivalent to a 60-watt incandescent bulb, yet uses only 9 watts of energy. The LB60Z offers great value and convenience with an estimated 22+ year lifespan (3 hrs./day avg.), and remote control through a compatible Z-Wave hub or controller.

WS15Z-1 Wall Mount Switch

The Linear WS15Z-1 Wall Mount Switch allows remote ON/OFF control of loads connected to the switch, and is easily wired in place of a standard wall switch.

Replaceable Trim Ring

The WS15Z-1 Wall Mount Switch has a field replaceable trim ring - the color of the device can be altered with the Trim Ring Kit model in black, brown and almond.

WT00Z-1 3-Way Wall Mount Accessory Dimmer/Switch

The WT00Z-1 Wall Mount Accessory Dimmer Switch allows remote ON/OFF control and dimming of lights controlled by associated Z-Wave modules, creating virtual 3-way switches. The WT00Z-1 controls no load directly, so it can be wired anywhere power is available, without the need for a traveler wire.

Replaceable Trim Ring

The WT00Z-1 3-Way Wall Mount Accessory Dimmer/Switch has a field replaceable trim ring - the color of the device can be altered with the Trim Ring Kit model in black, brown and almond.

WD500Z-1 Wall Mount Dimmer

The Linear WD500Z-1 Wall Mount Dimmer allows remote ON/OFF control and dimming of connected lights. The dimmer switch is easily wired in place of a standard wall dimmer, and requires a Neutral connection.

Replaceable Trim Ring

The WD500Z-1 Wall Mount Dimmer has a field replaceable trim ring - the color of the device can be altered with the Trim Ring Kit model in black, brown and almond.

Also Available: WD1000Z-1

Linear also offers a 1,000 watt capacity dimmer, model WD1000Z-1.

Linear Z-Wave Lighting Products

WO15Z-1 Wall Mounted Outlet

The Linear WO15Z-1 Wall Outlet is wired in place of a standard duplex receptacle. This device allows remote ON/OFF control of loads connected to the bottom outlet (the other outlet remains powered at all times).

2008 National Electric Code Compliance

The 2008 NEC requires that all new installations of single and multi-family homes install tamper-resistant outlets. The WO15Z-1 is fully compliant with this code.

PD300Z-2 Plug-in Lamp Module

Z-Wave Plug-in Lamp Module

The Linear PD300Z-2 Plug-in Lamp Module is designed to provide Z-Wave control to a connected dimmable lamp. The PD300Z-2 module is plugged into any standard grounded AC wall outlet, and the lamp is then plugged into the module. Once connected, the lamp can be dimmed or turned on or off remotely via the Z-Wave controller. The module contains two power receptacles - one controlled, and one pass-through (powered at all times).

AutoSense

Unique to Linear, the AutoSense feature allows for local lamp activation independent of the Z-Wave controller status. With AutoSense, one can simply switch the connected lamp's manual switch off, then on, and AutoSense will instruct the PD300Z-2 to turn the lamp on.

PS15Z-2 Plug-in Appliance Module

The Linear PS15Z-2 Plug-in Appliance Module is designed to provide Z-Wave control to a connected load. The PS15Z-2 module is plugged into any standard grounded AC wall outlet, and the appliance or other device is then plugged into the module. Once connected, the appliance/device can be turned on or off remotely via the Z-Wave controller. The module contains two power receptacles - one controlled, and one pass-through (powered at all times).

FS20Z-1 Isolated Contact Fixture Module

The Linear FS20Z-1 Isolated Contact Fixture Module can be mounted in a single- or multi-gang electrical box to operate loads or control relay-based devices. The relay can be isolated for dry contact applications or powered to switch live loads. This device can operate loads of up to 277v.

Possible Applications: *Commercial Lighting, In-Ceiling Lighting/fans, Dry-Contact Relays, Pool Pumps, Water Heaters.*
